Fair value gains on revaluation of investment properties held through subsidiaries, associates and joint ventures totaled S\$115.6 million and these mainly came from the revaluation of Perennial International Health and Medical Hub, CHIJMES, Capitol Singapore and AXA Tower. • Overall, the Group achieved a profit after tax and minority interest (“PATMI”) of S\$79.0 million, of which St. James’ leisure and entertainment business accounted for a loss of approximately S\$0.4 million for the period from 1 July 2014 to 27 October 2014. KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

Investing in the Bonds involves substantial risks. Set out below are some of the key risks of investing in the Bonds. This list is not exhaustive, and does not represent all the risks associated with, and considerations relevant to, the Bonds or your decision to purchase the Bonds. The value of the Bonds may rise or fall. These risk factors may cause you to lose some or all of your investment.

For more information, refer to the section entitled "Risk Factors" on pages 20 to 54 of the OIS.

Business-Related Risks

Risks Relating to the Group's General Business and Operations

• Development Risks

- o The Group's business may be adversely affected by delays in the construction and completion of its Real Estate Properties under development.
- o It may be difficult for the Group to assess the future performance of the Real Estate Properties which have a limited track record because they are still under development. There is no assurance that such properties will yield the expected returns.
- o The Group is reliant on contractors or sub-contractors to carry out its property development and failure by such contractors to perform their obligations may lead to delay of completion of the project and unexpected costs.

⁶ Assuming that S\$150 million in aggregate principal amount of Bonds are issued under the Public Offer and S\$50 million in aggregate principal amount of Bonds are issued under the Placement.

⁷ Assuming that S\$250 million in aggregate principal amount of Bonds are issued under the Public Offer and S\$50 million in aggregate principal amount of Bonds are issued under the Placement.

• **Real Estate Sector Risks**

- o The Group operates in a capital-intensive industry and expects to have significant funding needs for its existing business operations and new projects to grow its business. However, there is no assurance that the Group will be able to obtain financing on terms that are commercially acceptable.
- o The loss of anchor tenants or a significant number of tenants in any of the Real Estate Properties, completed developments or future acquisitions, could result in periods of vacancy, which could adversely affect the revenue and financial conditions of the Group.
- o A downturn in the businesses of anchor tenants or a significant number of tenants could similarly have an adverse impact on the business and financial condition, results of operations and capital growth of the Group.

• **Healthcare Sector Risks**

- o The Group's operations are affected by challenges that affect the healthcare industry generally, such as technological and pharmaceutical improvements that increase the cost of providing, or reduce the demand for, healthcare.
- o The Healthcare Business is heavily regulated, subject to various laws, regulations and approvals concerning the licensing of facilities and personnel and, in respect of the Healthcare Business in China, may also be subject to foreign ownership and investment restrictions.
- o The tenants of the Group's medical and healthcare facilities may not be able to compete successfully with other healthcare service providers, which may affect the Group if the tenants' ability to make rental payments to the Group is impacted.

• **Business Operations Risks**

- o The Group faces competition from other real estate developers, investment funds and other institutions in the countries in which it operates for the acquisition of suitable development sites and available investment properties.
- o Some of the Real Estate Properties are located in areas that have other competing properties and the income from, and market value of, these Real Estate Properties will be largely dependent on the ability of the Real Estate Properties to compete against other properties in these markets in attracting and retaining tenants.
- o As the Group has a limited operating history, the retention of Mr Pua Seck Guan (the Chief Executive Officer and Executive Director of the Group) is crucial to the Group.
- o The Group's business is focused primarily on real estate in China and in Singapore and is therefore subject to a higher level of risk as compared to a portfolio which has a more diverse range of investments in other asset classes.
- o The Group manages various properties in various roles and capacities (such as asset manager, development/project manager, property manager and trustee-manager). The revenue from the Group's management business is dependent on the performance of the properties it is managing.

• **Joint Venture Risks**

- o The Group invests in entities which it does not control and which involve other partners and/or investors. There is no assurance that the Group will be able to control or exercise any influence over the assets of such entities or that the Group will be able to pursue its stated strategies with these entities. On 14 April 2016, the Issuer, through its wholly-owned subsidiaries, filed applications for the winding-up of three of its associated companies. The basis for the applications was that the shareholders and management of the associated companies (of which the Issuer's subsidiaries hold an effective 50.0 per cent. stake) are in deadlock. Should the Singapore court allow the applications and make an order that the Issuer (through its subsidiaries) divests its stake in the associated companies, the Group would no longer have any interest in Capitol Singapore.

General Risks Relating to Countries in which the Group Operates

- The Group is subject to risks inherent in doing business in the jurisdictions in which it operates, which include the risk of nationalisation and expropriation of the Real Estate Properties, currency fluctuation and regulation risks, social unrest or political instability and adverse economic, political and other conditions.
- With respect to the Group's business activities in China, it is also subject to risks such as property austerity measures implemented by the Chinese government, measures taken by the Chinese government to tighten the requirement for lending to property developers and the uncertainty involved in the interpretation of Chinese laws and regulations.
- With respect to the Group's business activities in emerging markets, it is subject to risks such as volatile and unpredictable political, legal, regulatory and economic environments and the possibility of the emerging markets being or becoming subject to sanctions administered or imposed by the United States, such as the Office of Foreign Assets Control of the U.S. Department of the Treasury (OFAC) or similar sanctions imposed by any other country.

Risks Relating to Financials

- **Full three years audited historical financial statements in relation to the PREHL Business are not available.**
 - o The selected audited financial information for 18M2015 contained in the OIS is not necessarily indicative of the future performance of the Group.
 - o The limited established operating track record and historical financial information in relation to the PREHL Business will make it more difficult for investors to assess the Group's future performance and prospects. There is no assurance that the Group will be able to generate sufficient revenue from its operations to fulfil the payment obligations under the Bonds.

Legal, Regulatory and Enforcement Risks

- **The Bonds are unsecured obligations of the Issuer**
 - o The Group employs, and may continue to employ, investment structures to hold its new investments in real estate projects where equity instruments and junior or subordinated bonds are excluded from the calculation of Consolidated Net Debt (as defined in the Terms and Conditions).
 - o The Bonds would rank below existing secured borrowings of the Group (amounting to S\$1,216.8 million as at 31 December 2015).
 - o As a result of the holding company structure of the Group, the Bonds are structurally subordinated to existing and future liabilities and obligations of the Group, which means that other creditors of the Group (other than the Issuer) will have priority over any claims of the Bondholders.
- **Legal investment considerations may restrict certain investments**
 - o Each potential investor should seek independent legal advice to determine whether and to what extent (a) the Bonds are legal investments for the potential investor, (b) the Bonds can be used as collateral for various types of borrowing, and (c) other restrictions apply to the purchase or pledge of any Bonds.

Market and Credit Risks

- **The market value of the Bonds may fluctuate**
 - o Trading prices of the Bonds may be influenced by numerous factors including the respective operating results and/or financial condition of the Issuer, its subsidiaries (if any), associated companies (if any) and joint venture companies (if any), and political, economic, financial and any other factors that can affect the capital markets, the industry of the Issuer and the aforementioned entities.
- **An investment in the Bonds is subject to interest rate risk**
 - o The Bonds are fixed income securities and may therefore see their price fluctuate due to fluctuations in interest rates. Generally, a rise in interest rates may cause a fall in the prices of the Bonds.

Liquidity Risks

- **There is no prior market for and there is limited liquidity of the Bonds**
 - o The Bonds comprise a new issue of securities for which there is currently no established secondary market. There can therefore be no assurance that a secondary market will develop or, if a secondary market does develop, as to the liquidity of that market for the Bonds or that it will continue for the entire tenor of the Bonds.
 - o There can be no assurance as to the ability of investors to sell, or the prices at which investors would be able to sell, their Bonds.

Other Pertinent Risks

- **The Terms and Conditions and the provisions of the Trust Deed may be modified**
 - o The Trust Deed contains provisions for convening meetings of Bondholders to consider any matter affecting their interests. These provisions permit defined majorities to bind all Bondholders including Bondholders who did not attend and vote at the relevant meeting and Bondholders who voted in a manner contrary to the majority.
